

AG GUARD

ABOUT AGARAM

AGARAM Global a boutique Security Training and Security Technology Solutions provider that brings in a combined wealth of experience of more than 50 years, with our management team comprising industry veterans who have seen all aspects of security from consultancy, operations, business development, to client engagement.

The focus is on Security Consultancy that leads to the introduction of Software for Security Officers' Duties (which also facilitates back-end Office Management), Visitor Management Systems, technology such as Video Analytics with License Plate & Facial Recognition, Internet of Things, etc.

The backbone of all these is training to build up the competencies of the officers to adapt to these technologies as well as short courses in Security Training to make them more effective and efficient at their duties, as well as be confident to react to various security & safety contingencies such as Fire Emergency.

WHY **AG GUARD** ?

- Provide effective technology aided services to client.
- Strengthen security service provider to uplift their profile for secured sustainability in the sector.
- Can be a vital digital based tool to diversify present headcount base security services to technology aided services.
- With enhanced productivity, security companies can manage the additional cost without demoting their profit.

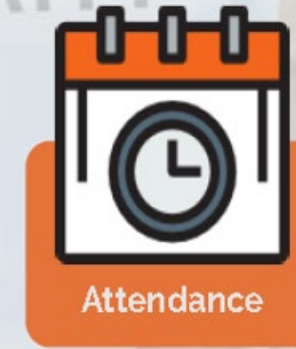

BENEFITS OF **AG**GUARD

- APPYGUARD is a software developed to help the security officers to perform most of their functions electronically instead of manually. By performing their daily routine using APPYGUARD substantial time can be saved as they do not have to write anything repetitively.
- The software benefits the Clients with better, accurate and faster data with clarity as all reports are in electronic form instead of manual form. It benefits the security officers with ease of use, less efforts as no need to write, better working conditions makes them more efficient.

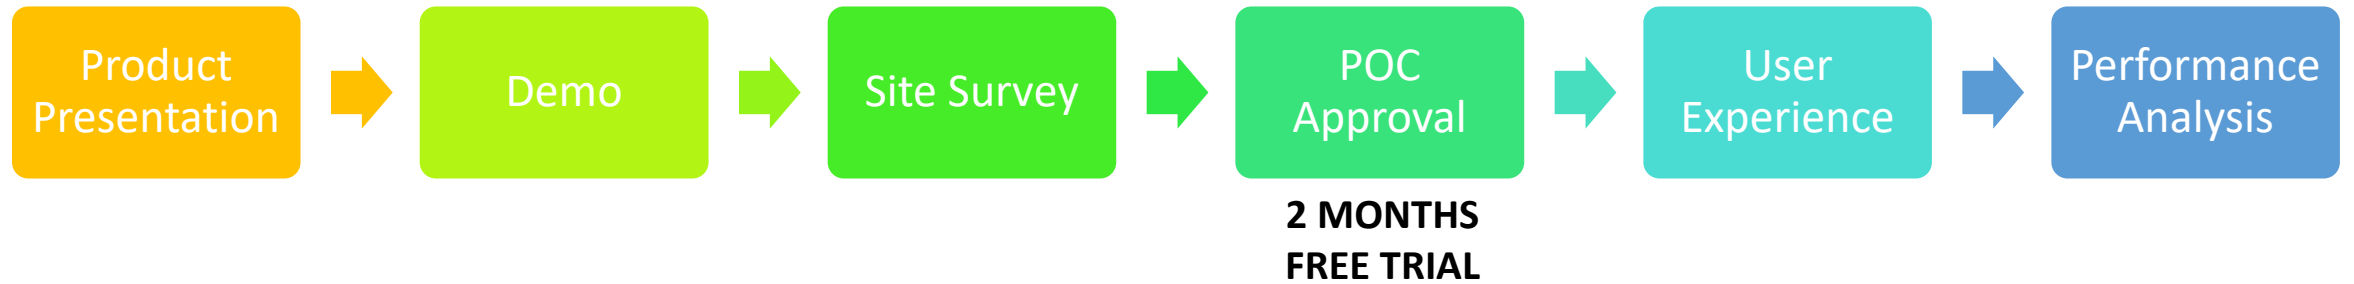

BENEFITS OF **AG**GUARD

- It also helps the Security Company to provide better service to clients, timely reports as the system is cloud based, additional information with photos and value-added services like attendance system for the client's contractors etc. The Security Company will also be able to retain their guards for longer period as the guards are happy to work with less repetitive workload.
- APPYGUARD is developed as a Smart Phone apps to make it interesting for everyone to use it. It is used by the least educated guards with bi-lingual (Malay & English) language facility. It is proven beyond doubt that the guards love to use the software

Click Driven Solutions

Instant Data Collection

FEATURES OF **AG**GUARD

1. Guard Attendance System
2. Visitor/Contractor Management System
3. Clocking System
4. Incident Reporting System
5. Defect Reporting System.

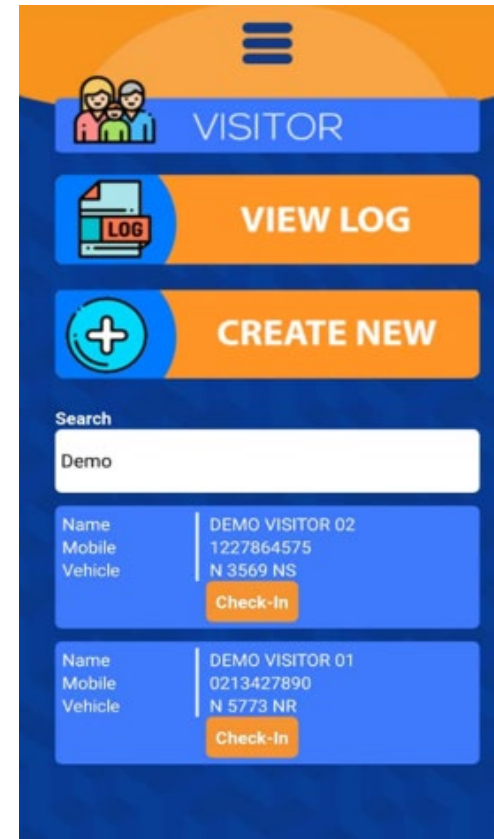

GUARDS ATTENDANCE MODULE:

- The Attendance module of APPYGUARD will help to record and retrieve guard's attendance instantaneously at any point of time and from anywhere in the world.
- The software has provision to capture and record the face of the security officer while registering their attendance which will ensure that there is no possibility for proxy attendance.
- This attendance system can also be used for other contract staffs to capture their time in and time out

VISITOR & CONTRACTOR MANAGEMENT SYSTEM(VMS):

- The VMS will capture the details of visitors/contractors electronically and stored in the data base along with the photograph of the Visitors/contractors for future reference. The VMS helps to record details of the visitors/contractors without the guards writing the details again and again which saves lots of time of the security officers.
- APPYGUARD VMS has the Blacklist feature which helps to prevent entry to blacklisted visitors/contractors by flashing the message on the screen that they are blacklisted.
- USER FRIENDLY: With the Personal Data Protection Act (PDPA) in place, guards cannot collect, keep NRIC of visitors/contractors due to which the scanning of NRIC to retrieve existing data is not possible anymore. APPYGUARD VMS helps to retrieve data with use of part of any information like few digits of Car number, Mobile number, Unit number etc. which makes information retrieval very fast.

CLOCKING SYSTEM MODULE:

- The Clocking System with QR code will be installed at project sites. There is no NFC buttons as clocking points which is an extra hardware. The QR codes are GPR enabled and the location of the QR codes are monitored.
- The Clocking System is mobile enabled with an app which will ensure the clocking tour is completed unless bypassed with valid reason.
- The clocking reports are instantly available for viewing by the authorised personnel anytime, anywhere in the world.

INCIDENT MANAGEMENT SYSTEM

- APPYGUARD INCIDENT MANAGEMENT SYSTEM is a new thing. This module helps to capture the details of incident when happens.
- The details of incident can be recorded in snap shots(photographs), and Audio (voice note). All the details can be uploaded to the cloud and can be seen by the client/client representative immediately upon upload.
- These information in the form of Photographs and can be produced as evidence, if necessary.

Location of Incident
Tower 8 Level 5 lift.

Extent of Damage
Lift selector button broken.

Findings
Still usable. Need to replace sooner.

Action taken so far
Informed technician Mr.Alibaba.

Follow-up action

DRAFT SUBMIT

DEFECT REPORTING SYSTEM:

- APPYGUARD DEFECT REPORTING SYSTEM is a new feature. Guards will be able to capture the details of defects found - during their patrolling/clocking - and the data can be uploaded to the client representative for follow up action.
- Data on Defects can be retrieved date wise, item wise for follow up action taken to rectify defects.

A screenshot of the APPYGUARD defect reporting form. The form has a blue header and a white body. It contains the following fields:

- Tower 8 Level 5 lift.**
- Extent of Damage**: Lift selector button broken.
- Findings**: Still usable. Need to replace sooner.
- Action taken so far**: Informed technician Mr.Alibaba.
- Follow-up action**: (Empty text box)

At the bottom, there are icons for a camera, three photo thumbnails (each with a red 'x'), a microphone, and an audio icon (also with a red 'x'). Below these icons are two buttons: 'DRAFT' (blue) and 'SUBMIT' (red).

OUR ONE DEVICE SOLUTION

- Currently, all the above functions are either performed manually or few of the above functions are performed by different products with different vendors.
- There are separate Biometric Attendance System, Visitor Management System & Clocking System.
- These individual systems are not as efficient as APPYGUARD in terms of features and performance

Existing Project Setup

Project Setup With APPYGUARD

- Reduce Manpower min 1 headcount based on increased of productivity.
- **APPYGUARD System supports daily activities on site.**
- Daily activity data organized & can recall from cloud storage at anytime from anywhere.

Final Remark

- With all the above features, we hope APPYGUARD can bring in total transformation in Security Service.
